

Reduce the cost of maintenance and down time of Your MRI Scanner room

We Offer Low cost Solutions to Scanner Room Lighting

**Interference
Free Images**

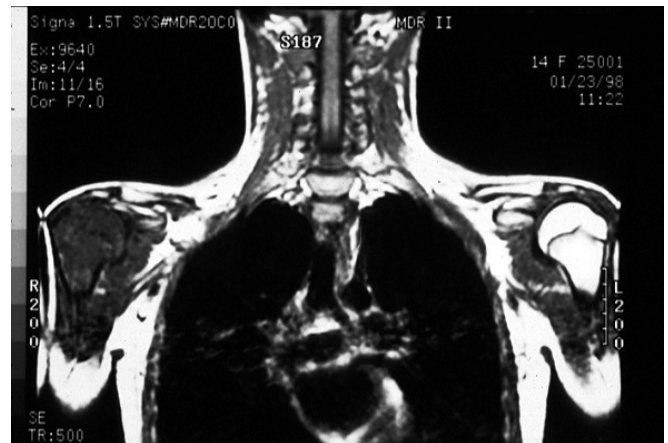

**Fibre Optic
Lighting**

See the difference

Our system provides lighting with no metal parts or filaments using high transmission fibre optic technology which improves imagery

Light is produced by using powerful easy maintained light sources placed outside the scanner rooms RF cage. The system removes the need for maintenance on lamps inside the scanner room area.

Our system resolves the problem of scanning quality, it reduces down time, it increases throughput and efficiency.

Can be used in new or existing scanner room installations
